EXPERIENCE

Wohlig Transformation

03/2023 - Present

Software Development Engineer

Vidyavihar, Mumbai

- Build a vast e-commerce platform for a leading fantasy sports company, serving millions of users. Empowered by state-of-the-art tech, it ensures smooth point redemption for a seamless user experience.
- Led the engineering team in developing a dynamic news and media portal akin to Cricbuzz, which gained significant traction. Delivered real-time updates and personalized content to sports enthusiasts, fostering an engaging user experience.
- TUI: Requirements writing AI assistant. Implemented secure authentication with Cognito, covering login, token refresh, and expiry. Enhanced user experience with streamlined one-click flow, optimized with loaders, alerts, clipboard functionality, and robust API error handling. Introduced new feedback capabilities like ChatGPT integrated with third-party API. Addressed token expiration issues in AWS Cognito through auto-login feature, ensuring seamless user experience leveraging React and its ecosystem.
- Led a developer team in crafting pixel-perfect websites and intricate animations using Webflow.
- **Confixa** Single-handedly developed the company's primary DevOps platform website, crafting an interactive, animated, and responsive site from concept to launch.
- Leading a multifaceted 8-repository project with full-stack development, ensuring smooth integration between frontend and backend. Personally implementing features, optimizations, and fixes to deliver a unified user experience.

Topcentile

07/2022 - 01/2023

Frontend Developer

Lower Parel, Mumbai

- Built a Profile management web application for students and professionals to register personal details viewable by admins for team assignment and remarks. Worked on Many tan-y Projects,
- Leveraged **React, Redux, HTML, CSS, JavaScript, Material UI, SCSS** features.

PROJECTS

E-Commerce | MongoDB, Express, React, Node, Tailwind

- Designed and built an ecommerce web application from front to back utilizing MongoDB, Express, React, Node.js (MERN) for the database, backend API, frontend user interface, and overall stack.

LinkedIn Clone | React, Redux, Firebase, Material UI

- Engineered a LinkedIn replica web application enabling user signup/login and real-time posting with Redux state management and Firebase database integration.

Review Hub | React, Firebase, Tailwind

- Created a platform for users to share movie and web series reviews with upload and OTP authentication functionality powered by a Firebase backend.

Realtime Voice text | React-Speech-Recognition, React, Tailwind

- Developed Speech to Text Converter, a React hook that converts speech from the microphone to text and makes it available to React components.
- Created reusable hook to capture speech input and leverage Speech Recognition API to convert audio to text in real-time for use in React applications
